ABSTRACT

5 A combination entertainment system for
providing both jukebox and game entertainment is
disclosed. The entertainment system comprises a
jukebox subsystem, a dart game subsystem, and a
control subsystem that coordinates a jukebox mode of
operation and a dart game mode of operation. Also
10 disclosed is a method of operation for the
combination jukebox and game entertainment system.
The method transfers operation between game,
jukebox, and advertisement modes of operation, based
on patron input and the current operating mode of
15 the system.
